Who - 2006 spawned the beginning of Permeance Technologies.

What - At the enterprise end of government we've consulted on and delivered Solution & Software Architecture, Systems Analysis, Solution Development and general Web Development.

Solutions – Our focus is on Enterprise Content Management Systems (ECMS) and Enterprise Portals. We have proven ourselves as successful and competent implementers of Enterprise Solutions.

Relationships: We have relationships that span the nation and sectors, with a heavy leaning to Govt. We have established relationships with the Department of Education in Western Australia, Landgate WA, Dept of Planning WA, SACE SA, Central QLD University.

Our philosophy - All software should be open and built with the adoption of industry accepted standards.

Active - Our software engineers and architects are active participants and contributors in a number of open -source communities.

- Initialise and configure portal sub-systems such as Content, Document, Wiki and Blogs.
- Produce operations guide for ongoing support and management

Quality Assurance

The Permeance team can assist with your Liferay deployment by providing a complete review and audit of your implementation. This will include a review of your physical and application architecture. We can also provide traditional testing services such as

- System testing
- Functional testing
- Regression testing

ARCHITECTURE

Our architecture team are specialists in understanding the technical and application landscape in your organisation. We have experience in completing detailed designs, working with design constraints, such as design patterns, architectural patterns, programming idioms, and refactoring.

DEVELOPMENT

Permeance's team have many years experience in the development of innovative online systems. Our team have worked in the Government, Travel and Financial industries across the world.

SUPPORT

Our 24/7 Helpdesk is geared to support your next Enterprise Portal and Content project. We provide enterprise support for Liferay Portal and provide custom support, based on your requirements
